**Subject:** RE: Couple of questions about state PFAS projects

Hi Kate

- 1) What kind of samples are these? Air or liquid? Sounds like liquid. You have cc'd Tom who I would reach out to if these are water samples.
  - 2) I have no recollection of receiving rain water samples from Test America on Chemours' behalf. My quick search didn't reveal anything, but I will dig deeper. Are these samples missing, meaning Mark does not have them, but they've been shipped to and received by EPA?
- Jeff

**Subject:** Couple of questions about state PFAS projects

Hi Jeff

- 1) About 2 weeks ago I sent some information about the Michigan study looking at PFAS in mist suppressants in chrome etching plants. They will be sampling the mist suppressant product itself and the waste effluent before it reaches the water treatment at probably 3 locations. Michigan is currently coming up with their sampling plan. We expect to send these samples through Strynar's lab. Is there someone from NRMRL who should be advising this project as well?
- 2) I have some notes from Oct 22, 2018 that say we received some rainwater samples from North Carolina with you receiving and custodian of the CoC. Did I get that right? Do you know what happened to those samples?
